What it takes to build a successful internet company?

From an initial spark of an innovation's brain child to thousands of man-hours in building the product, every founding team has given life to their business model with their sweat and blood.

We started Primefort on a mission to secure such hard built innovations. Starting from Millions of dreams to engineer our mission to hitting millions of dollars in revenue, our process in perfecting security for our clients has been exponentially increasing.

Bootstrapping from securing mobility services, virtual storage solutions, digital currency technologies to Leading our security services to India's leading legal platform and a global Ed- Tech leader.

We are striving hard to secure our clients hard built innovations. We embark our milestone of achieving for securing companies over a total net-worth of 23 Billion dollars.
